FROM 1990 THE ECOLOGY IS OUR PHILOSOPHY!

BIODEGRADABLE

The **biodegradable** material solves problem of items arrived to the end of its cycle of the life, and **does not generate waste**.

RECYCLED

The **recycled** material help to **convert waste materials** into reusable material to prevent waste of potentially useful materials.

 The biodegradable material solves problem of items arrived to the end of its cycle of the life, and does not generate waste.

 Le materie plastiche biodegradabili risolvono il problema degli articoli a fine ciclo di utilizzo perché non generano nuovi rifiuti.

 La matière biodegradable va résoudre le problème des articles qui sont arrivés à la fin de leur cycle vital, et on ne va pas originer des déchets.

 El material biodegradable resuelve el problema de las mercancías llegadas al final de su ciclo de la vida, y no genera residuos.

 The recycled material helps to convert waste materials into reusable material to prevent waste of potentially useful materials.

 Le materie plastiche riciclate aiutano a convertire i rifiuti in materiali réutilisables pour prévenir la diffusion de matériaux potentiellement inutiles.

 La matière recyclé aide à transformer les déchets en matériaux réutilisables pour prévenir la diffusion de matériaux potentiellement inutiles.

 El material reciclado ayuda a convertir los materiales de desecho en materiales reutilizables para evitar el desperdicio de materiales útiles.

BIODEGRADABLE

(EN) Our „green” pens are produced with a new bioplastic of natural origin: born from renewable resources of agricultural origin (non genetically modified corn starch) and return to the earth through biodegradation and/or composting processes without releasing polluting substances (also the dyes used are biodegradable). The pens produced with this new bioplastic (except refill and spring) are 100% biodegradable responding to the demand for consumer products with low environmental impact.

(IT) Le nostre penne „green” sono prodotte con una nuova bioplastica di origine naturale: nascono da risorse rinnovabili di origine agricola (amido di mais non geneticamente modificato) e tornano alla terra attraverso processi di biodegradazione e/o compostaggio senza rilascio di sostanze inquinanti (anche i coloranti usati sono infatti a base biodegradabile). Le penne prodotte con questo nuova bioplastica sono biodegradabili al 100% (eccetto refill e molla) rispondendo alla domanda di prodotti di largo consumo a basso impatto ambientale.

(FR) Nos stylos „green” sont fabriqués avec une nouvelle bioplastique d’origine naturel: ils arrivent de ressources renouvelables d’origine agricole (Amidon de maïs, pas modifié génétiquement) et retournent dans le terrain parmi des processus de biodégradation et de compostage sans relâcher des substances polluantes (Les couleurs aussi sont réalisées avec une base biodégradable). Les stylos réalisés avec cette nouvelle bioplastique sont biodégradables au 100% (hormis cartouche et ressort) en répondant à la demande de produits de grande consommation et avec un petit impacte environnemental.

FORTE GREEN

BEVERAGE CARTON

ecoline

(EN) EcoLine is a line of writing instruments made in a special material coming from the recycling of beverage cartons. Beverage cartons are in fact composed of several layers: cellulose, polyethylene and aluminum. After a first processing for the recovery of cellulose, the fraction of polyethylene and aluminum is further processed to generate a new second raw material. This recycled material has a very particular aesthetic aspect (thanks to the presence of aluminum together with the plastic component) which distinguishes it from any other on the market.

(IT) EcoLine è una linea di articoli da scrittura realizzati con uno speciale materiale proveniente dal riciclo dei cartoni per bevande. I contenitori per bevande sono infatti composti da diversi strati: cellulosa, polietilene ed alluminio. Dopo una prima lavorazione per il recupero della cellulosa, la frazione di polietilene ed alluminio viene ulteriormente lavorata per generare una nuova materia prima seconda. Questo materiale riciclato si presenta con un aspetto estetico del tutto particolare (grazie alla presenza dell'alluminio unitamente alla componente della plastica) che lo contraddistingue da ogni altro sul mercato.

(FR) EcoLine est une gamme d'articles pour réaliser avec une matière spéciale provenant du recyclage des cartons alimentaires. Les contenants pour boissons sont composés parmi différents couches: cellulose, polyéthylène et aluminium. Suite à un premier traitement pour récupérer la cellulose, la partie de polyéthylène et aluminium sera encore traitée pour obtenir une nouvelle matière première. Cette matière recyclée se présente avec un aspect particulier (grâce à l'aluminium uni au composant plastique) qui est le trait distinctif parmi les autres matières sur le marché.

R-PET

PET recycled

EN „rPET line“ is a line of writing articles made with recycled PET coming from the collection of water bottles and / or drinks. Once the differentiated collection is carried out and the material is transported to special sorting centers, this is shredded and regenerated in the form of flakes and granules. Thanks to its characteristics, PET can then be reused to create new products because during the recovery process it does not lose its fundamental properties. The recycled PET thus becomes rPET.

IT „rPET line“ è una linea di articoli da scrittura realizzati con il PET riciclato proveniente dalla raccolta delle bottiglie d'acqua e/o bevande. Una volta effettuata la raccolta differenziata e trasportato il materiale in appositi centri di smistamento, questo viene triturato e rigenerato in forma di scaglie e granuli. Grazie alle sue caratteristiche, il PET può essere poi riutilizzato per dar vita a nuovi prodotti poiché durante il processo di recupero non perde le sue proprietà fondamentali. Il PET riciclato diventa così rPET.

FR „rPET line“ est une ligne d'articles d'écriture réalisés avec du PET recyclé dont l'origine est le tri des bouteilles d'eau et des boissons. Une fois effectué le tri et le transport des déchets au centres de recyclage, cela va être tritiqué et régénéré sous forme d'écaillles et grains. Grâce à ses spécifications, le PET peut être ensuite réutilisé pour donner origine à des nouveaux produits, car pendant le processus de récupération ne perd pas ses propriétés fondamentales. Le PET recyclé devient donc rPET.

ES La línea „rPET“ es una línea de bolígrafos hechos con PET reciclado proveniente de la colección de botellas de agua y / o bebidas. Una vez que se realiza la recolección diferenciada y el material se transporta a centros de clasificación especiales, este se tritura y se obtienen granulos. Gracias a sus características, el PET se puede reutilizar para crear nuevos productos porque durante el proceso de recuperación no pierde sus propiedades fundamentales. El PET reciclado se convierte así en rPET.

HARMONY

(EN) We love. We care.
SafeTouch Antibacterial™
an ideal solution for public places
where the pen is passed on from hand
to hand, and where children play. An
antibacterial component added to the
plastic is active through out the entire
life cycle of the pen. After 24h 90% of
bacteria are killed. The antibacterial
effect has been confirmed and certi-
fied. The material is completely safe
for the skin.

(IT) Noi amiamo. Noi ci preoccupiamo.
SafeTouch Antibacterial™
La soluzione ideale per i luoghi pubblici
in cui la penna viene passata di mano
in mano e dove i bambini giocano. Un
componente antibatterico aggiunto
alla plastica è attivo durante tutto il
ciclo di vita della penna. Dopo 24 ore
viene ucciso il 90% dei batteri. L'effetto
antibatterico è stato confermato e cer-
tificato. Il materiale è completamente
sicuro per la pelle.

(FR) Nous aimons. Nous faisons attention.
SafeTouch Antibacterial™
Une solution idéal pour les lieux pu-
blics où les stylos sont passés de main
en main, et où jouent les enfants. Le
composant antibactérien ajouté à la
plastique du stylo est actif pour toute
la vie du produit. Après 24 heures le
90% des bactéries sont tués. L'effet an-
tibactérien a été confirmé et certifié.
Le matériel est testé pour une pleine
compatibilité avec les peaux sensibles.

(ES) Nos encanta. Nos preocupamos por eso.
SafeTouch Antibacterial™
La solución ideal para lugares públ-
icos donde el bolígrafo se pasa de mano
en mano y donde juegan los niños. Un
componente antibacteriano agregado
al plástico está activo durante todo el
ciclo de vida del bolígrafo. Después de
24 horas, el 90% de las bacterias muer-
ten. El efecto antibacteriano ha sido
confirmado y certificado. El material
es completamente seguro para la piel.

NFC SERVICE

- Tantra
- Zen

(EN) NFC = Near Field Communication
Is the technology that can connect two devices, located at a short distance from each other, without having to use any cables, without using cameras and without entering any pins or passwords.

An NFC tag is a kind of "electronic tag" that has a programmable NFC chip to do something automatically when the smartphone reaches the minimum connection distance.

What is it for?

The most frequent use in marketing is to open internet pages containing videos, presentations, catalogs, brochure, offers, business cards.

(IT) NFC = Comunicazione Distanza Ravvicinata
È la tecnologia in grado di mettere in comunicazione due dispositivi, situati a breve distanza l'uno dall'altro, senza dover utilizzare alcun cavo, senza usare fotocamere e senza inserire alcun pin o password. Un tag NFC è una specie di "etichetta elettronica" dotata di un chip NFC programmabile affinché faccia qualcosa automaticamente quando lo smartphone raggiunge la distanza minima di collegamento.

A cosa serve?

L'utilizzo più frequente in ambito marketing è quello di aprire pagine internet contenenti video, presentazioni, cataloghi, brochure, offerte, biglietti da visita;

(FR) NFC = Near Field Communication
(Communication en champ proche)
Il s'agit d'une technologie qui permet de connecter deux appareils, situés à une courte distance l'un de l'autre, sans utiliser des câbles et sans saisir des codes ou de mots de passe.
Un tag NFC est une sorte de "label électronique" équipé d'un chip NFC programmable pour faire quelque chose automatiquement lorsque le smartphone atteint la distance de connexion minimale.

À quoi sert-il?
L'utilisation la plus fréquente en marketing est d'ouvrir des pages Internet contenant des vidéos, présentations, catalogues, brochures, offres, cartes de visite.

ZEN QR-CODE

(EN) QR code = Quick Response Code
It is a special code that contains a series of information that will appear on the smartphone or tablet simply by framing it with the camera.

It's a tool that acts as a link between the offline and online world, avoiding the use of static pages in favor of a wider and constantly updated communication.

How can be used: from business cards - whose data can be automatically saved on your mobile phone - to links to web pages with more diversified contents.

(IT) QR code = Quick Response Code (Codice a risposta veloce)
È un codice speciale che contiene al suo interno una serie di informazioni che appariranno sullo smartphone o tablet semplicemente inquadrando con la fotocamera.

È uno strumento che funge da collegamento tra il mondo offline e quello online, evitando l'utilizzo di pagine statiche a favore di una comunicazione più ampia e costantemente aggiornata.

Le applicazioni sono molteplici: dai semplici biglietti da visita - i cui dati si possono salvare automaticamente sul proprio cellulare - ai link a pagine web dai contenuti più diversificati.

(FR) QR code = Quick Response Code (Code à réponse rapide)

C'est un code spécial qui contient à l'intérieur une série d'informations qui apparaîtront sur le smartphone ou tablette simplement en le en le cadrant avec l'appareil photo.

C'est un outil qui connecte le monde offline et online, évitant ainsi l'utilisation de pages statiques en faveur d'une communication plus large et constamment mise à jour.

Les applications sont plusieurs: dès simples cartes de visite – dont les données on peut les sauver automatiquement sur son portable – aux pages web aux contenus plus diversifiés.

(ES) Código QR = Quick Response Code (Código de Respuesta Rápida)
Es un código especial que contiene una serie de información que aparecerá en el teléfono inteligente o tableta simplemente enmarcándola con la cámara.

Es una herramienta que actúa como enlace entre el mundo offline y online, evitando así el uso de páginas estáticas en favor de una comunicación más amplia y constantemente actualizada.

Las aplicaciones son múltiples: desde tarjetas de visita, cuyos datos se pueden guardar automáticamente en su teléfono móvil, hasta enlaces a páginas web con contenidos más diversificados.

SILKSCREEN 360°

(EN) Rounded Overprinting 360°
The technique of screen printing that allows to print almost the full circumference of the pen, it increases the field of advertising presentation.

(IT) Stampa Circolare 360°
E' la stampa su superfici rotonde: permette di aumentare l'area di stampa rispetto quella tradizionale in linea grazie alla possibilità di utilizzare tutta la circonferenza della penna.

(FR) Impression Permanent 360°
La technique de la sérigraphie permet une impression sur des surfaces arrondies. Cela augmente la présentation du champ de la publicité sur l'objet, grâce à la possibilité d'imprimer le périmètre complet du stylo.

(ES) Impresión Redonda 360°
La serigrafía permite la impresión de superficies curvas. Esto aumenta el campo de presentación de publicidad sobre el objeto, gracias a la posibilidad de imprimir el perímetro completo del bolígrafo.

DIGITAL PRINTING 360°

(EN) Digital Overprinting 360°
360° to satisfy your creativity. Digital foil allows you to print photos on the whole barrel.

(IT) Stampa Digitale 360°
La stampa a 360 è perfetta per la vostra creatività: permette di ricreare immagini fotografiche su tutta la circonferenza della penna.

(FR) Impression Numérique 360°
360 pour ta créativité. La feuille numérique permet de recréer les photos sur toute la surface du corps.

(ES) Impresión Digital 360°
360° para tu creatividad. La película digital permite recrear fotos en toda la superficie del producto.

DIGITAL PRINTING

(EN) Digital Overprint
Full-color flat digital print that allows to present gradation of colors and accurate details of the logo.

(IT) Stampa Digital
Stampa digitale in quadricromia per superfici piane. Adatta a loghi molto definiti.

(FR) Impression Numérique
Impression numérique multicolore et plate. Elle permet de former les gradations coloristiques.

(ES) Impresión Digital
Impresión digital a todo color en superficies planas. Permite la transición entre tonalidades.

PAD PRINTING

(EN) Pad Printing
The technique of printing on small, not necessarily flat, surfaces. Appropriate for labeling different kinds of plastic and metal.

(IT) Tampografia
Processo di stampa per piccole superfici, spesso irregolari. Può essere utilizzata per la stampa su diversi tipi di materiali (plastica, metallo).

(FR) Tampographie
C'est une technique d'impression adaptée aux petites surfaces, pas nécessairement plates. Elle convient à toutes sortes de matières plastiques, de métal ou de bois.

(ES) Tampografía
Tecnología de impresión en superficies pequeñas, no necesariamente planas. Es apto para todo tipo de materiales artificiales, metal o madera.
